

Stuff about space on the internet.

<http://www.noradsanta.org/en/index.html>

NORAD usually tracks satellites, but on xmas eve they track Santa as he leaves the North Pole and journeys around the world to leave presents for children. The website tells you how they do it. You can follow Santa and find out about the countries he is visiting. You will know when he is about to visit you!

this is the European Space Agency (Britain belongs to it) and has very good stuff for children - you can learn about space, you can also help find out new things!

.....
<http://spaceplace.nasa.gov/en/kids/>

this is the NASA website for kids

.....
